Become more productive

by speeding up your workflow

The stable and innovative Philips SpeechOne Docking Station provides wireless charging and easy pairing with the SpeechOne Wireless Headset. The magnetic mechanism makes docking the device incredibly easy. Simply snap-on the headset for a hassle-free and reliable charge. The Status Light reduces interruptions and increases productivity. Benefit from a smoother and easier workflow which saves you time and allows you to be more efficient.

Top performance

- Easy pairing with a Philips SpeechOne Wireless Headset for flexible use over multiple work stations
- Wireless charging for added convenience
- Status Light for reducing interruptions and increasing productivity

Developed for professionals

- Full control over your dictations and Skype calls for added efficiency
- Kensington security slot for theft protection
- Optional foot control for hands-free dictation

Highlights

Easy pairing

Just place your Philips SpeechOne into the station and it will be paired within moments and is ready for use. This allows you to be more flexible and easily work with various docking stations in different places.

Wireless charging

The battery of the SpeechOne headset can be charged easily and wirelessly up to 80% in only one hour. The magnetic mechanism makes docking the device incredibly easy. Simply snap-on the headset for a hassle-free and reliable charge.

Status Light

Reclaim control over your availability by clearly signifying to colleagues whether you are "available" or "busy". Thanks to the flexible, rotating magnetic mounting system of the Status Light, you can easily attach it on different surfaces. The light automatically turns red when you are using the headset to record or in a call. You can always change your status using the button on the docking station.

Full control

The dedicated buttons on the docking station allow you to control your dictations without having to touch your headset. The LEDs clearly indicate the status of the recording and battery status. You can also pick up or decline incoming Skype Business calls.

Theft protection

Use the Kensington lockdown equipment to secure the Docking Station to a desktop or other surface, protecting it against theft.

Optional Foot Control

An optional foot control (ACC2300 series) can be connected directly to the Docking Station and used for comfortable hands-free recording control.
