

Within the Plantronics range of headsets – there is a perfect PC gaming headset for the needs and price points of everyone.

We know that any gamers hardware should be as powerful as their gaming skills, so the GameCom headsets deliver rugged construction and vigorous sound, in comfortable, lightweight designs. All with noise-cancelling microphones which enhance speech accuracy and a stow away microphone boom to tuck away when the headset is not in use.

Don't just take our word for it:

“A serious pair of headphones for serious gamers. [The Dolby 5.1] does an incredible job of enhancing audio quality and adds a whole other experience to gaming, video and even some music tracks.”

Stereo	.Audio 355 Stereo over-the-head, 40mm speakers for studio quality sound, lightweight comfort, noise-cancelling microphone, in-line mute and volume controls	

DSP technology – what is it?

Digital signal processing (DSP) is technology that improves both outgoing and incoming audio. The result is clearer voice calls and improved audio listening over typical PC audio. Plantronics now offers this technology in its USB stereo headsets, delivering **digitally enhanced audio** at an affordable price.

DSP directly improves the experience in these areas:

- Improves voice clarity by removing distracting background noise
- Captures the full voice range, resulting in more natural voice conversations and superior VoIP experience. It provides so to speak high fidelity voice
- Crystal clear sound by preventing the creation of audio distortion in music and videos
- Acoustically tuned digital equalizers produce rich stereo sound

Crystal clear sound
Superior VoIP
Voice clarity

The NEW .Audio line of PC headsets feature high-performance DSP technology to deliver superior stereo sound and audio

Plantronics has extended its award-winning family of .Audio™ PC headsets with four new wideband models that feature high-performance digital signal processing (DSP) technology for unparalleled audio quality when listening to music, gaming and for PC-based conversations.

Ideal for podcasts and PC-based conversations on services including Skype and Google Talk, each headset combines a noise-cancelling microphone with advanced DSP technology that work together to effectively remove ambient noise, while still maintaining the natural sound of your voice. The headsets are optimized for use with Skype 4.0 Super Wideband which offers you – through the use of a greater frequency range of the audio spectrum than conventional telephone calls – clearer, richer sound that gives the feeling of true ‘face-to-face’ conversations.

The new line-up includes:

Plantronics .Audio™ 476 DSP – voice on the go – ideal for the frequent traveler as the over-the-head wearing style folds almost flat for easy storage.

Plantronics .Audio 646 DSP – the perfect headset for all your PC audio needs, in a discreet behind-the-head design.

Plantronics .Audio 626 DSP – the perfect headset for all your PC audio needs.

Upgraded .Audio 655 DSP – performance and comfort – headset delivers deep bass and full-range digital audio through 40 mm speakers and features Fast Mic Mute™ technology that lets users quickly mute the microphone by raising the boom. For ease of use, the headset features one-touch volume controls on the earpiece.
