# BT DIVERSE REPEATER

## BT DIVERSE REPEATER

- Extends the range of your existing Diverse\* and Synergy base stations
- Roaming - calls can be made and received anywhere within the range provided by the base station and the repeater
- No wiring required - just plug into the mains

- Base station range extension • Mains powered • Easy installation • GAP compatible
- Wall mountable

Most DECT base stations are 6 channel systems. An external call taken in the repeater cell will take up 2 of the 6 channels. This will reduce the number of channels available for other calls. The Diverse Repeater is not recommended for fax or PC modems. The Diverse Repeater should be placed within 2 metres of a power socket. Power adapter included with the product. Up to 3 Repeaters can be registered to 1 Diverse base station.

The Diverse Repeater should be installed in a dry, sheltered environment not exceeding the recommended temperature range - 10C - 50C.

\*Excluding the Diverse 1000
