

Paper adhesive DK labels

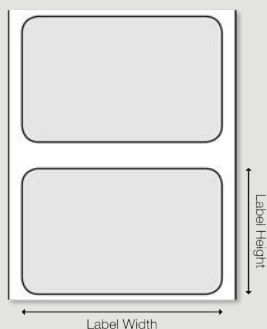

Specifically designed for the QL range of label printers, Brother's exclusive continuous roll technology delivers significant cost and time savings by removing the need to use multiple rolls for different jobs.

Choose from 12 pre-sized labels, such as standard address and barcode labels for specific labelling jobs. Or choose from 14 different widths of continuous rolls, up to 30 metres long, allowing you to produce bespoke labels any size you need.

Unique to Brother is the ability to print in red* as well as black, without ink – helping to create added stand out for important labels, such as confidential documents or fragile warning.

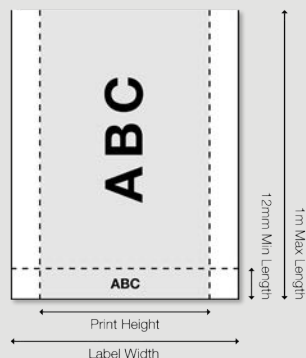

Choose from:

DK LABEL

Pre-sized labels

DK TAPE

Continuous roll labels

Popular rolls include:

- Pre-sized small address labels
- Pre-sized standard address labels
- Pre-sized large address labels
