

## Business dictation out of the box

>> A PC-free solution featuring Digta dictation device and transcription station

### Digta 420 Stand-alone Kit

... offering all the benefits of the latest generation of digital devices.

Play-back with excellent audio quality directly from the Dockingstation – no PC connection required.

**Grundig Business Systems presents a genuine out-of-box dictation system that is not PC dependent.** Comprising a digital dictation device and play-back accessories.

It gives you a digital head start – no installation or integration with the network necessary. Simply dictate and go – pass the dictation device to the secretary for the dictation to be transcribed directly from the Dockingstation.

Headphones and foot control are directly connected to the Dockingstation for comfortable operation and easy playback and winding.

Also available as Stand-alone Kit including a Digta 415 (see reverse)

## The Digta "Stand-alone-Kit" is the ideal solution where...

- an extended digital workflow solution is too complex (and expensive) for you
- you require an autonomous dictation system which is not connected to your PC for security reasons
- you still want to experience the very latest in digital dictation technology
- you want to be well-prepared for the future

The **out-of-the-box solution** can grow in line with operational demands – together with the DigtaSoft software it can easily become a fully featured dictation network.

### Your benefits of digital dictation:

- Easy to use devices in a modern design
- Insertion and deletion of text passages later on
- Constantly high sound quality
- Built-in permanent storage with 10 or 20 hours of recording time
- Memory cards offering an additional recording capacity of 20 hours
- Up-to-date transcription without rewinding

- >> COLOUR DISPLAY
- >> DSSPRO STANDARD
- >> SOFT TOUCH COMPOSITE®
- >> ENCRYPTION
- >> 20 H RECORDING TIME
- >> WORKS WITH BATTERIES OR RECHARGEABLES
