## enhancing headset use

### doro hs21

Doro hs21 fits most telephones and allows convenient switching between handset and headset.

### doro hs22

Doro hs22 is a hs21 with an on-line indicator added. No more interruptions when you are using your headset. Doro hs22 indicates that you are talking on the telephone by an external flashing LED.

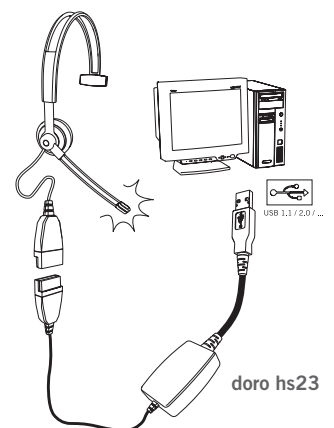

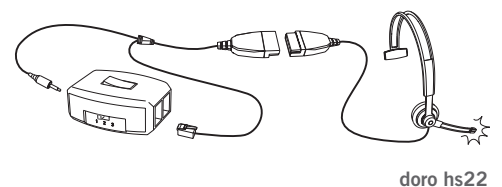

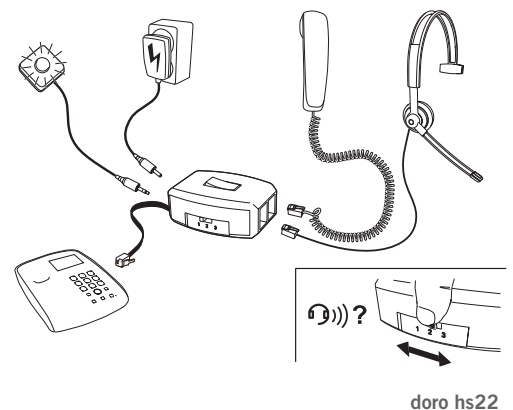

The switch in Doro hs21 and hs22 enables use of standard connected headsets to almost all telephones.

### doro hs23

Doro hs23 is an adapter enabling internet telephony by connecting your headset to the USB port of your computer.

### doro hs27rec

Doro hs27rec is a recorder adapter that connects Doro hs21/hs22\* to any recording device with a 3.5 mm stereo plug input.
