GRUNDIG
Business Systems

Your dictation device – plus professional systems for your transcription service – can get you to the completed document stage quickly, easily and confidently.

High play back quality combined with easy to use features and long-lasting quality have spoken for themselves for decades. The proven classics - featuring the »Steno-Cassette 30« - the German DIN standard - and the »Microcassette« – the most used cassette system around the world. With our systems you are also well positioned for any future transition to digital dictation solutions. For example the Stenorette digital Sd 4240 is the flexible interface providing entry to the digital dictation world. Analogue accessories can continue to be used.

You will get all information on the very latest in digital dictation technology from your Grundig Business Systems Partner or directly from Grundig Business Systems:
