Travel with
a mouse as
boundless
as you.

Expect more from your wireless mouse. The SureTrack™ Dual Wireless Mouse amplifies your productivity with more – more tracking surfaces, more connectivity options, more security and more personalisation. This is the first low profile mouse to offer adaptable wireless connectivity options while also providing precision tracking, even on the most difficult surfaces.

- **Adaptable wireless pairing** – Provides multiple pairing options – connect to a laptop or mobile smart device via Bluetooth 3.0 or 5.0 (Bluetooth LE) to save a valuable USB port, or to a desktop PC via the 2.4GHz USB-A Nano dongle.
- **Advanced tracking technology** – The high-performance optical sensor tracks quickly and accurately on even the most difficult modern office surfaces, including glass, granite, lacquer, marble and wood.
- **AES 128-bit encryption** – Meets corporate security protocols and protects your data from potential hackers with government-grade encryption technology.
- **Triple DPI button** – Easily adjust the cursor speed to meet your needs by selecting the appropriate DPI level (1200/2400/4000) – higher DPI for casual browsing or word processing and lower DPI for precision editing.
- **Universal compatibility** – Works with Windows, Chrome OS, macOS and Android. An ideal mouse for desktop PCs with or without Bluetooth functionality, and newer devices with BLE, such as the Surface Pro and MacBook Pro.
- **Sleek ambidextrous design** – A perfect low profile travel option with quiet buttons for the mobile professional, ergonomically designed to provide all-day comfort for your right or left hand. Available in five stylish colours.
