

Extremely long service life

Rapid 5050electronic

Stapling performance:	Up to 50 sheets (80gsm) 5,000 times
Magazine capacity:	5000 staples in 5050 5M Cassette
Stapling depth:	Adjustable up to 50mm
Weight:	2,200g
Colour:	Off-white. Transparent head guard: smoke, red or blue
Voltage/ Frequency (adapter):	230V/50-60Hz, 120V/50-60Hz, 240V/50-60Hz, 100V/50-60Hz
Dimensions:	A: Length 270mm B: Width 130mm C: Height 150mm

Your benefits

- **Stapling performance** – staples up to 50 sheets. 5,000 stapling actions per cassette.
- **Service life** – low life-cycle cost; guaranteed for 500,000 stapling operations (worn parts automatically replaced with every fresh cassette).
- **Flexible** – adjustable stapling depth and precise stapling of up to 50 sheets.
- **Functional** – precision stapling due to flat clinch (flat, neat corners).
- **User-friendly** – easy to understand instructions and simple loading. Reload indicator light shows well before staples run out. Green = Ready for Use. Red = Replace Cassette (only 19 or fewer staples left).
- **Working environment** – quiet operation, low vibration.

Sturdy work table (optional extra) for easier, more flexible stapling.

Staple cassette simplifies reloading and reduces reloading frequency. Cassette also contains wear parts for increased service life.

The R5050e is an efficient stapler based on new, progressive technology and design.

The two-year guarantee covers material and production defects, provided the right staple is used, Rapid original staples.

Driver and staple former blade are located in the cassette. Means no more worn out stapling heads to replace. Simple front loading.

Patented fine adjustment of staple ensures 90° angle between back and legs of each staple and increases reliability.

Self-priming action - first staple always ready for use with fresh cassette.

Red light diode gives early warning when staples are running low.

Patented stack sensor - adjusts and locks the aperture to suit the thickness of the stack. Saves electricity - no power wasted on compressing the page stack.

Pedal (optional extra). 

Vibration reducing design and sound absorbing base make for quiet action.

Flat clinch for neat and even corners.

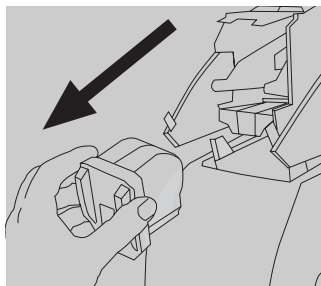

Adjustable stapling depth up to 50mm.

Staples hardly ever run out

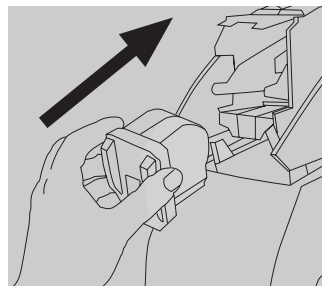

THE RAPID 5050e GIVES TROUBLE-FREE STAPLING. THE STAPLE CASSETTE CONTAINS ALL OF 5,000 STAPLES, SO THE STAPLES HARDLY EVER RUN OUT.

And with the wearing parts located in the cassette the Rapid

5050e is extremely durable. Every time you replace the cassette, you automatically replace the driver blade and staple former blade. This unique, patented feature enables you to staple up to 50 sheets of 80gsm paper at a time at least 500,000 times.

Easy to load. To remove the empty cassette, just the head guard, take hold of the cassette (see picture) and pull out.

Insert the new cassette (see picture) and push in until it clicks home. Replace the guard. The stapler is now ready for another 5,000 stapling operations.

Sturdy work table for easier, more flexible stapling. (Optional extra).

The pedal is ideal for precision stapling in industrial applications. Simple plug-in connection. (Optional extra).

Choose from three transparent head guard colours - smoke, red or blue. (Optional extra).
