SPECIALITY FILTRATION SOLUTIONS

Allergy & Flu Filter

Boost protection from airborne viruses, flu and allergens. The Allergy & Flu Antiviral HEPA filter captures 99% of airborne allergens and viruses, including the H1N1 virus.

Inhalation of fine particulate matter such as pollen have been linked with asthma, bronchitis and other health problems. Both bacteria and viruses are types of germs that are commonly found in indoor air. One sneeze or cough can cause these particles to become airborne, increasing the likelihood of infecting anyone that comes in to contact with them.

Odour Filter

The Odour filter is specially designed with a larger amount of activated carbon and a HEPA drum filter. Carbon pellets help remove common cooking and cleaning odours, and reduce certain VOCs.

One of the most enjoyable parts of cooking is the satisfying smells that overpower the kitchen. However, these satisfying smells can turn unpleasant after they linger for some time. Mould, cigarette smoke, pets, and congested rooms may be a nuisance or even harmful.

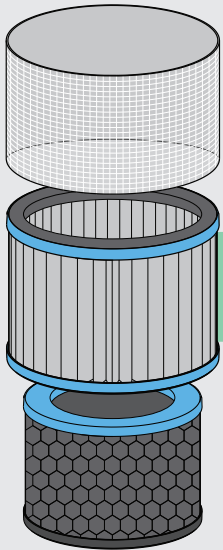

Pet Filter

The Pet filter with HEPA helps capture up to 99.97% of pet dander and hair and helps eliminate common pet odours so you can breathe cleaner air in your home.

Sneezing, shortness of breath and watery eyes may all be signs that Fluffy, Fido or even Tweety are giving you more than companionship and unconditional love. It is estimated that 10% of people are allergic to household pets.

Enjoy cleaner air

Customise your air purification with the best filter that meets your needs. Filter replacement is essential for your purifier to perform at its best. The air purifiers will indicate when to change the filter based on average usage.
