

BT Selector

July 2008

Bringing it all together

Welcome to the Selector

This publication presents you with the complete current range of BT products for your consumer and small business customers.

Browse complete ranges

The contents are organised into sections by product type. Each section has its own colour so its easier to locate what you want. You'll also find a series of charts to help you compare features across ranges.

Locate what you want fast

Within each section you'll find products presented in alphabetical order by name. As you're aware, all our product names start with 'BT' so the second element of each name obviously guides its position.

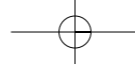

Get a better understanding of what's what

We've included definitions of all our product features in a single glossary for easy reference.

Tell us what you think

As ever we welcome your feedback so please let us know how this version of the Selector works for you.

On contract with Broadband Talk.

The BT Hub Phone 1020 is a simple way to use your BT Broadband connection, enjoy Hi Definition Sound (Hi-dS) clarity, low-cost calling plans and take advantage of the future services that BT has planned.

BT HUB PHONE 1020

- Hi Definition Sound (Hi-dS)
- Low cost calls via BT Broadband Talk
- Black and white graphic display with back light
- Keep track of incoming calls with the 50 number calls list
- 150 entry phonebook, with the facility to store a home, work and mobile number for each of your contacts
- 20 Number redial list, for quick and easy redialing

Item Code	039024
Colour	White
Barcode	5016351514924
CSS Code	B22434
Size	15.6 x 12 x 5.7cm
Weight	476gms

You can link up to 5 Hub Handsets to your Home Hub – so you can use BT Broadband talk on your broadband line from whichever room in the house you choose, not just where your home hub is. There is a simple procedure in your user guide to link your handsets to your hub phone system.

Accessories

BT ADSL MICROFILTER

- Plugs into a phone socket and allows user to plug in both a telephone and broadband modem
- Protects telephones from interference from ADSL noise

• ADSL Microfilter • Compliant with the BT Network

Item Code	034738
Colour	Alpine White
Barcode	TBA
CSS Code	A68676
Size	5.5 x 4.1 x 2.2cm
Weight	62gms

One microfilter is required for each phone extension that has equipment plugged into it.

*In ideal conditions. **To obtain optimum standby talk time, customers must maintain batteries correctly as per the instructions in the user guide.

† There is a battery save mode that is factory set to off, but if switched on will give increased battery standby time to 160hrs, however the display will turn off when the handset is in standby mode.

BT Diverse Repeater

BT DIVERSE REPEATER

- Extends the range of your existing Diverse* base station
- Roaming - calls can be made and received anywhere within the range provided by the base station and the repeater
- No wiring required - just plug into the mains

• Base station range extension • Mains powered • Easy installation • GAP compatible • Wall mountable

Item Code	871715
Colour	Charcoal Grey
Barcode	5016351602621
CSS Code	A52937
Size	3.1 x 11.9 x 12.7
Weight	180gms

*Excluding the Diverse 1000

Most DECT base stations are 6 channel systems. An external call taken in the repeater cell will take up 2 of the 6 channels. This will reduce the number of channels available for other calls. The Diverse Repeater is not recommended for fax or PC modems.

The Diverse Repeater should be placed within 2 metres of a power socket. Power adapter included with the product.

Up to 3 Repeaters can be registered to 1 Diverse base station.

The Diverse Repeater should be installed in a dry, sheltered environment not exceeding the recommended temperature range - 10C - 50C.

- Infrared remote control
- Supports JPEG up to 26 mega pixels)

- Alarm / Clock and calendar
- Control buttons: 6 x buttons – power, menu, enter, back, forward, up and down
- LCD timer for auto on and off
- Rotating slideshow with various effects
- Landscape / Portrait orientation

Technical Information

- Photo format supported - Up to 26M pixels, JPEG / MJPEG / AV1 / MP3
- DC 9v @ 2A

BT eFrame 1000

8" Wi-Fi Digital Photo Frame

Top Selling Points

- Superb quality 8 inch display screen (800 x 600 resolution)
- In-built wireless allows you to copy or stream photos and MP3 tracks from your PC to your eFrame wirelessly
- Stream photos directly from Flickr™ accounts to your eFrame
- Transfer photos straight from your memory card
- Intuitive, easy to use interface with remote control

Wireless connectivity allows you to “free” years of digital photos from your PC hard-drive, bringing a flow of memories into your living room.

In addition, the share service allows friends and family to share in each others daily lives through pictures: by sending photos direct to each others frames, they can maintain emotional closeness despite geographic separation.

Imagine the possibilities! Purchase an eFrame for your parents and send them updated photos of their grandchildren every day, direct to their eFrame 1000.

Additional features

- Wireless built-in (802.11b/g)
- 128MB on board memory
- Operate with handy remote control or use the buttons on the eFrame

- Load photos via memory cards (SD/MMC/MS(Pro)/CF); USB flash drive; USB from camera; USB from PC; Wireless from PC
- Automatic photo slide show/ manual browsing/ thumbnail
- Variety of user controllable transition effects for slide show
- Landscape or portrait orientation
- Photo rotation
- Zoom in/out
- Auto on/off at your desired time (sleep mode)
- Supports MP3 playback with and without slide show
- 2 Built-in stereo speakers
- Calendar and clock view with embedded photo slide show

GLOSSARY

1471 Feature

Access BT's 1471 facility at the touch of a button to find out the telephone number and time of call of your last caller.

1571 Message Indicator

Flashing light Indicator for new BT Answer 1571 messages.

2 High-quality microfilters included

Microfilters comply with BT SIN 346 v2.2.

802.11b Wireless Standard

The protocol and frequency on which the product operates allowing data streams of up to 11Mbps/s.

802.11g Wireless Standard

The protocol and frequency on which the product operates allowing data streams of up to 54Mbps/s.

6 Presets for each mode – internet radio, MP3, FM radio

Set your most favourite internet radio stations, MP3 albums & FM radio stations.

Access to BT Select Services

Allows you to access BT's Select Services such as call waiting, call diversion and reminder call at the touch of a button.

Activity Reports

Print out detailing the last fax/faxes sent.

Adjustable Number of Rings

Allows user to set the number of rings before the answering machine picks up the call.

ADSL Microfilter

Can have up to 4 Microfilters on a line (totalling 4 REN).

ADSL Speed

The maximum data transfer rate over the network connection.

Alarm

Making use of an integrated clock, this feature allows you to use your telephone as an alarm.

Alarm Siren

85dbA Siren which sounds on the internal monitor unit.

Alert Reporting

System allows up to three contacts to be set-up to receive notification by phone, SMS or email in the event of an incident.

Analogue Ports

Allows the use of standard telephones, fax machines, answering machines and cordless telephones to make & receive calls.

Analogue Telephone Socket

Allows user to plug an additional telephone into the system to have a separate phone conversation with the calling party.

Announce Button

Used to listen to the pre-recorded emergency announcement and to record your own personal message (via the handset).

Answering Machine Enables messages to be left by callers.

Answering Machine Card

Allows user to upgrade system to incorporate a handset controlled answering machine.

Answering Machine Interface

Allows an answering machine to be connected to your fax machine.

Answer-only facility Answering machine can be set to play an outgoing message only and not allow a caller to leave a message.

Anti-tangle handset cord

Resists handset cord from becoming tangled.

Application Software

Allows your PC to access an ISP, send & receive email and faxes, transfer data at high speeds, and answer calls.

Appointment Scheduler

Allows appointments or important dates to be noted by time, date & description.

Assymmetrical Data Rate

The maximum amount of data that can be downloaded and uploaded per second. Assymetrical because the maximum amount of data flow is different between upstream and downstream.

Audible Message Alert

Notifies of awaiting messages by beeping slowly. This facility can be switched off if preferred.

Auto Fallback

Automatically reduces the speed of transmission in noisy environments for Wireless LANs, or for fax machines to enable communication between devices.

Auto Squelch

Ensures that only strong transmission signals are received. Auto squelch is always active unless monitor function is switched on.

Auto-talk

Automatically connects the line when picking up the handset from the base.

Automatic Answer Facility

Allows user to receive incoming faxes automatically.

Automatic Redial

Redials the number if the receiving fax machine is engaged or does not answer.

Automatic Sheet Feeder

Holds documents to be faxed or copied and feeds them into the fax machine automatically.

AV In/Out

Allows user to connect auxillary equipment to the device.

Back up Batteries

Enable use during mains power failure and ensure information stored remains saved.

Backlit Display

The product's LCD is illuminated for ease of use in dark areas.

Base Station Listening

Allows users to listen to calls via the phone's base station.

Base Station Range Extension

Extends the range of a DECT base station an additional 50 metres indoors and 300 metres outdoors (in ideal conditions).

Batteries Included

This product is supplied with batteries.

Battery Backup

Batteries are required to enable the phone to function during loss of mains power.

Battery Low Warning

Battery low icon will be displayed to indicate the batteries need recharging or replacing.

Belt Clip

Enabled the handset to be attached to a belt.

Big Buttons

Large button design for those with sight or dexterity impairments.

Bluetooth Technology

Bluetooth refers to a short-range radio technology aimed at simplifying communications between devices. Bluetooth technology was ideally designed to replace the plethora of cables that connect our fixed and mobile devices. With Bluetooth technology these devices can communicate without wire over an air interface using radio waves to pass information back and forth between devices.

Bridging and Routing Functions TBA.

Broadband Sharing

Connect multiple computers to one Broadband line wirelessly or through existing phones lines.

Broadcasting Capability

Allows a document to be sent to multiple destinations.

Built In BT Textphone prefixes

Pre registered with the TextDirect service number to enable quick connection to the service.

Built In Emergency Sequence

The action and features that are

available when an alarm is raised on a carer telephone system, such as the In Touch 2000. A carer is alerted by a flashing light and loud, continuous beeps, and can then take control of the telephone line of the user remotely, altering the volume of the handsfree operation, clearing down the line to enable an emergency phone call to take place.

Cable Compatible

Compatible with cable telephone lines.

Calculator

Built-in calculator.

Calendar Function

Displays the time, date & month of calls received in the calls

Call Alert Tone

A ringing tone to alert that another radio user wants to communicate with you.

Call Barring

Allows a user to prevent certain numbers from being dialled.

Call Button

Used to access the calls list.

Call Counter

Displays the number of calls received since the last viewing of the calls list.

Call Director

Allows user to direct calls to a specific extension or handset.

Call Divert

Allows user to divert calls to alternative extension/phone number/voice mail service when unanswered.

Call Feature

Allows user to divert calls from a door intercom to an alternative number (eg mobile number).

Call Forwarding

Allows user to forward calls to alternative extensions or handsets.

Call Hold

Allows a call to be muted or the caller to hear hold music.

Call Indicator Icon

Alerts user that new calls have been received.

Call Indicator Light

Flashes when the phone is ringing.

Call Intercept

Allows a user to answer incoming calls from any extension on the same phone line, even if the answering machine has started to answer the call.

Call List

When a caller display service is employed, this feature logs and stores incoming calls to be recalled at the touch of a button.

Call Logs

Allows a record to be made of calls initiated during a business development programme to avoid duplication and monitor call success rates.

Call Logs(2)

Allows a record of all calls made or received to be downloaded to a PC or printer.

Call Minder Message Indicator

Flashing light Indicator for new BT Call Minder messages.

Call My Bill

Allows you to access details of your last phone bill at the touch of a button. (You will need to have your account number ready for reference).

Call Pick-up

Allows an incoming call to a specific handset or extension to be answered from another handset.

Call Screening

Allows user to identify an incoming caller before answering the call.

Call Sign

Provides a user with two telephone numbers in order to differentiate between callers. (This does not provide a completely separate line).

Call Timer

Monitors the duration of a call, beginning from the time the line is engaged.

Call Transfer

Allows a call to be transferred from one handset or extension to another.

Call Waiting

A beep occurs while a phone is engaged alerting the user to an incoming call. Users can choose whether to sitch between callers or ignore the incoming call. On some phones, when used with Caller Display, the incoming caller's number will be displayed to allow the user to screen the call.

Caller Display

When used with a Caller Display service, this feature allows you to see the number of the calling party.

Camera

Fully adjustable camera with removable lens cover.

Camera Port

Standard port for incorporating a digital camera or camcorder.

Can be plugged into the back of a HiFi

The player can be connected to a HiFi via phono cables (provided) and uses the existing speaker set up.

Cancel Button

Allows user to cancel the emergency sequence on the In Touch 2000 phone package, or to delete entries in the Directory and Calls Lists.

Channel Auto-selection

Automatically selects the clearest channel for optimum line clarity.

Channel Bonding

Allows user to use the full capacity of their ISDN line (128kbit/s) to send data faster than using only one channel.

Channel Scan

It will scan all channels until it finds a channel with a transmission in progress.

Channels

The number of frequencies the phone can use.

Client Service Auditing

Logging enables customers to constantly monitor how quickly calls are returned i.e. between receiving a call and returning a call. This information provides useful evidence about dealings with clients and can be used to improve service levels to clients.

Clock

Time is displayed when the product is in idle mode.

Clock/Alarm

FM radio or buzzer (only when mains powered).

Colour Handset Fascias

Allows the fascias of the handset to be changed.

Combined Voice & Data

Multifunctional device allows user to connect either a data call or a voice call using the one device.

Companding Noise Reduction

Reduces background noise, providing much clearer reception at all times.

Compliant with the BT Network

This product has been tested and is compliant with BT network specifications.

Conference Calling

Allows you to hold a three way call with up to two external callers. (A quarterly fee may be payable).

Conference Calling Button

Allows user to conference a third party into a conversation at the touch of a button (when used in conjunction with BTs Three Way Calling service).

Confidential Transmission

Allows you to send a fax to a password protected fax machine (on the receiving side of the call).

Connection to the Broadband Internet

Creates a wired connection between a computer (PC or MAC)

and the Broadband Internet.

Contrast Control

Allows user to adjust the contrast on the LCD.

Control Panel

Monitors accessories and reports battery low or no response messages.

Conversation Replay

Enables user to review previous telephone conversations.

Copier Facility

Allows user to make single copies of documents.

Corded Handset on Base

Base Unit includes an integrated corded handset.

Customisable

Allows user to control the functions of the telephone.

Data Port

Allows user to connect a PC modem or other device to the telephone line.

Data Transfer Rate

The maximum data transfer rate over the network connection.

Day & Night Modes

Provides different functionality during different parts of the day.

DECT

Digitally Enhanced Cordless Technology (DECT), also known as digital cordless. Provides enhanced call clarity for clear communication.

Dedicated Fax Extension

Allows user to direct fax calls to the fax machine or, with Call

Sign, to differentiate incoming calls between fax and voice.

Delay Transmission

Enables user to programme a fax machine to send documents at a pre-arranged time.

Delete All

Allows user to delete all data, whether messages or call lists at once.

Detachable Mounts

Allows the user to change the way they wear their In Touch pendant. 2 mounts are included, as a wrist strap or a necklace.

DHCP Managed IP Addresses

Dynamically assigns IP addresses to each of the computers in the network.

Digital (tapeless) recording

Advanced digital recording technology removes the need for tapes.

Digital Internet Access

Speeds at up to 128kbps when used in connection with an ISDN or BT Home Highway line. Allows user to spend less time (than conventional analogue modems) on-line.

Digital Security

Prevents calls being overheard or picked up on other cordless telephones.

Digital Security Code Prevents unauthorised access to the product.

Digital Sound

Digital sound quality lets you hear every breath, gurgle, snuffle or cry with complete clarity.

With 120 channels auto-select you can also rest assured that it will be your baby you hear, not your neighbour's, unlike analogue baby monitors.

Digital Speech Quality

Corded call clarity on a cordless telephone.

Disconnect Indicator

Alerts user that the phone has been disconnected.

Distinctive Ringing

When employing the functionality of a Caller Display service, this feature provides a differentiated ringing melody when an incoming call is received that is stored in the phone's directory.

Document Memory

Product will receive faxes to memory and store them if your fax is out of paper.

Door Intercom/Entry System

Allows user to answer and control the entry door from a desk for added convenience and security.

Downloadable Handset Melodies & Screensavers

Allows user to personalise a handset by selecting ring tones and screensavers from a wide range of options.

Earpiece Volume Control

Enables you to adjust the volume of your call to a comfortable level.

Earth Recall

A type of recall operation often used on analogue switches.

Easy To Use Menu Facility

Allows you to remotely turn on the nightlight, turn on/off the lullabies and also set the temperature min. and max. levels via the parent unit.

Easy Installation

Easy to install by following the user guide provided.

Emergency Alert

Allows user to sound help or fire alerts from the panel or keypad.

Emergency Alerts

Emergency signal sounds from panel, keyfob or keypad.

Emergency Button

When pressed, this button activates the emergency alarm sequence on the In Touch telephone packages.

Ergonomic Handset

Easy to grip handset has been ergonomically designed to assist those with dexterity problems.

Error Correction Mode Ensures legibility of transmitted documents.

Ethernet Port

A 10/100 Mbps port allows user to make a wired connection between the device and the laptop or PC.

Ethernet or USB Port

Can also connect using USB or Ethernet interface.

Expandable

The system can grow as your needs grow.

Facility to Alter

Communications Mode Enables the device to communicate in

any mode (text or voice) with or without user intervention.

Fast Forward Playback

Allows messages to be played back at one and half times the normal speed.

Fast Forward/Rewind

Allows you to move quickly and easily through messages.

FasTxt Predictive Texting

FasTxt lets you write messages more quickly.

Fax Alarm

Alerts you if there is a problem with a faxed document (e.g. your fax machine has run out of paper).

Fax Extension

Enables a dedicated fax line when used in conjunction with Call Director.

Fax Number Memory

Stores fax numbers for quick reference.

Fax Status Indication

Displays or prints out a message indicating whether or not fax transmission has been successful.

FM broadcasts

FM Radio - for listening to terrestrial stations.

File & Printer Sharing

Allows users to share files and printers across the network.

Firewall

An integrated, professional strength firewall enables user to maintain network privacy and protects your computer from Internet attacks.

Flatbed Design

Allows user to scan and copy a variety of documents, photos, books, magazines and 3-D objects.

Forward/Backward Skip Allows user to skip between messages without playing the entire message.

Full Duplex Sound

Enables user to have a natural twoway simultaneous conversation.

G.dmt Compatible

A protocol that allows the device to work on the UK network.

GAP Compatible

GAP (Generic Access Profile) is the technology that allows digital handsets of different product families to communicate with one another.

Graphical User Interface

A user-friendly, browser based application which allows the user to control and set-up the product easily.

Grey Scale

Enables better reproduction of nontext images such as drawings and photographs.

Group Dialling

Allows you to call all handsets simultaneously.

Group Listening

Allows all handsets to participate on the same call.

Handset Intercom

Allows a two-way conversation between handsets.

Handset Priority

Allows user to prioritise which handset will ring when an incoming call is received.

Hands-free Dialling

Allows user to dial without lifting the handset.

Hands-free Operation

Allows user to hold a telephone conversation without lifting the handset.

Hands-free Volume Control

Allows the adjustment of the inbuilt loudspeaker.

Headphone socket

Headphone socket.

Headset Port

Allows user to fit a compatible headset to the unit to enable handsfree working (on a corded device) or user mobility (on a cordless device).

Hearing Aid Compatible

Allows users with hearing aids with a 'T' switch to hear their callers more clearly.

High Speed Internet Access

30% faster than standard 802.11g 54 Mbits/s.

Hotline Extension

Automatically dials a preprogrammed number when alerted.

IEEE802.11b DSSS 2.4 GHz Frequency Band

The protocol and frequency on which the product operates.

Illuminated Keypad

The handset keypad is illuminated at the touch of any button for

ease of use when in dark areas.

Incoming Message Audible Alert

Allows you to choose a melody/discreet tone/morse beep to announce a new text message.

Infra Red Facility

Allows user to dial a handsfree call by pointing the organiser at the cradle from up to three metres away.

Ink-jet Printing

Improves print quality and definition of faxed documents over ordinary fax machines.

Integrated Handset

Phone & Fax in one unit.

Interactive Troubleshooting Guide

Allows user to identify and solve common problems.

Intercom

Allows a two-way conversation between the handset & base station.

Internal Calling

Allows users to hold a conversation between handsets, even if other handsets in the system are on an external call.

Internal Call Waiting

Indicates an incoming external call during an internal conversation.

Internal/External Ringing

Differentiated ring tones to distinguish between internal and external calls.

Internet Connection Sharing

Allows users to connect more than one PC to the Internet. This

capability is available with both wired and wireless connections.

Internet Gateway

Allows user to share a single PSTN or ISDN internet connection on more than one PC.

Internet Monitoring Platform

Allows user to set up contacts and monitor activity in the home, over the Internet.

Internet radio

Access and listen to a choice of thousands of internet radio stations from all over the world.

ISDN Card

Allows user to upgrade system to incorporate ISDN2e lines in addition to existing PSTN lines.

Keypad Lock

Allows user to lock the keypad to prevent buttons being pushed accidentally.

Large backlight LCD

Shows information on station name, album & track information (if available).

Last Number Re-dial

Stores the most recently dialled numbers to be accessed again at the touch of a button.

LCD Display

Displays dialled numbers, and all other visible information.

Line in Use Indicator

Tells the user that the line is in use.

Link Alert

Confidence that an alarm will sound if link is broken for any reason.

Long Battery Life

The battery in the In Touch Pendant will last for up to four years, based on two presses per day. An indicator will appear when the battery has only one year of life remaining. It is recommended that the user replace the pendant when this indicator appears.

Loudspeaker Volume Control

Allows the adjustment of the inbuilt loudspeaker.

Mains Powered

Requires mains power.

Mains operated or battery powered

Requires 8xC size alkaline batteries not provided.

Memo Facility

Allows user to record a message for others in the household.

Memory

The total amount of memory this product has split across the dedicated device slots to enable the storage of Name and Number directories.

Memory without Power

Allows user to disconnect the phone without losing the numbers stored in the memory.

Menu Driven Display

Allows the user to navigate through the telephone's functions which are clearly and simply displayed on the handset LCD display.

Message Capacity Alert

Alerts user when recording capacity has been reached.

Message Counter

LCD displaying the number of messages received.

Message Indicator Light

Flashing light alerts user that a message has been left.

Message Timer

Records the duration of a message.

Message Volume Control

Allows user to alter the volume at which messages are played back.

Microphone Sensitivity

Either adjust the baby unit microphone sensitivity to comfortably hear the baby breathing or crying.

Microsoft Windows Certified

Software associated with this product has been registered and approved by Microsoft Windows.

Mimic Capability

Handset adopts the full feature functions of the base unit to which it is registered.

Mobiles & Headset Link

The product allows Bluetooth Mobile Phones and Bluetooth Headsets to be linked to it via the Bluetooth technology.

Modem On Hold Capability

Allows a user to suspend a data call to answer an inbound call, and then re-establish the data call without losing the connection. (Subject to availability of this feature from the Internet Service Provider).

Modem Speed

The maximum speed at which the

product will transfer data through the Internet connection.

Monitor Facility

Allows the user to monitor the system.

Mouthpiece Volume Control

Enables you to adjust the volume of your speech volume at a comfortable level for your callers.

Multi-base Capability

Allows multiple base stations to be added to the internal network to create a mini voice system.

Multi-channel Selection

The ability to choose and alter the channel frequency to provide exceptional call clarity.

Multifunctional

Allows user to print, scan, copy and send and receive faxes on a single device.

Multi-lingual

Choice of different languages.

Multi-Lingual Menus

Allows user to alter the language in which the menus are displayed.

Multiple Pendant Support

Allows two people in the same household to have an In Touch Pendant connected to an In Touch 2000 telephone.

Multiple Registration

One handset can be registered on up to four base stations.

Multiple Subscriber Numbering (MSN)

Allows callers to direct dial in to individual extensions.

Multiple Telephone Support

Up to three In Touch 2000 User phones can be registered to one In Touch 2000C Carer phone.

Music On Hold

Callers are entertained with music while on hold, reassuring that they have not been cut off.

Mute Function

The ability to mute the sound output from the receiver.

Name & Number Directory

Stores names and numbers in the phone memory.

NAT IP Address Sharing

Allows all PCs in a local area network to share one IP address.

Navigator Wheel

Allows user rapid access to the phone's directory, volume and calculator control.

Network Activity Indicator Light

Indicates an active connection to the network.

Network Capacity

The maximum number of devices recommended for connection to the network.

Number Record

In 'answer' mode this will record the telephone number of your callers, whether they leave a message or not. On playback you will be given the caller's number (unless the number was withheld) and the time of the call.

Operating Range

The radius in which the product will function.

Optical Character Recognition (OCR)

Allows user to translate scanned text into files that can be edited.

Other Accessories Available

Also for use with the Home Monitor: Keyfob, Keypad, Magnetic Contact, Movement Detector, Dummy External Siren, Smoke Detector.

Out of Range Warning

Visual or audible signal alerting the user that communication may not be possible due to distance from the base unit.

Outgoing Message Facility

Messages are pre-recorded on the answering machine (these can be overwritten with your own outgoing messages).

Output Resolution

The maximum number of dots per inch (dpi) on the printer or transmission output.

Paging Facility

Allows the user to page the handset from the base station.

Parental Control

Limits Internet access on your children's PCs.

Pause

Commonly needed for switchboards where a delay is required for switching purposes, this feature inserts a pause into a telephone number during dialling to ensure switch compatibility.

Payphone Extension

Allows direct access to an outside line with no need to dial 9, or to install an additional line.

PC Fax

Includes application software to enable user to send and receive faxes from a PC.

PC Interface

Allows user to connect the fax machine directly to a PC to enable user to send and receive faxes, print and scan directly onto a PC. (Software sold separately).

PC to Telephone Adaptor

A device to connect a PC USB port to a user's home telephone wiring.

Pictures

You can select a picture to be displayed on screen when you receive a call from a number stored in the phone book.

Plain Paper Feed

Tray for stacking paper ready for printing. Play/pause/stop Play/pause/stop.

Plug & Play Compatible

Software detects the device automatically within the PC making it easy to install and use.

Polling

Allows user to retrieve a document from another fax machine, or for another fax machine to retrieve a document from user fax machine.

Polyphonic Ringtones

Allows more than one note to be played at once offering a greater sound experience when your phones rings.

Portable

Portable. Power Adaptor used to connect the product to the mains

electric supply.

Power Indicator

Allows user to see when the unit is switched on.

Power Indicator Light

Light indicates when the unit is switched on.

Pre-dialling Facility

Allows user to dial a number and check to ensure it is correct before pressing the dial button to connect the call.

Print Method

The technology used to print documents.

Private Message Playback

Allows user to listen to answering machine messages using the telephone handset.

Programmable Keys

Allows user to alter the one-touch function buttons.

PSTN Line System

Allows user to connect a maximum of two separate telephone exchange lines to create a robust telephone system. (A separate change is payable for Difact Exchange Lines).

Quick Connect Capability

Allows the modem to shorten the initial connect time on a call, reducing the connect time by 50% or more.

Quickdial Memory

Stores carer numbers in emergency status mode, and alternative numbers when the emergency status is off.

Radio Pre-Sets

Allows user to programme favourite FM radio stations for quick access.

Recall

Function to be used for certain services, such as transferring calls, using BT Select Services and when using the product on a switchboard.

Redial Button

Allows one touch access to redial the last number that you dialled.

Reduce/Enlarge Facility

Zoom options allows user to reduce or enlarge the copied image from 25% to 400%.

Remote Answering Machine Access

Ability to access the system virtually, from a remote location and perform various functions including changing the outgoing message, message playback/delete, switching the machine on or off, etc.

Remote Answering Machine Activation

Allows user to switch the answering machine on or off while accessing the machine remotely.

Remote Call Answering

Allows user to answer and hang up incoming calls simply by pressing the pendant button.

Remote Change of Announcement

Allows you to change your outgoing answering machine message from another telephone.

Remote Programming

Allows an external party, such as the careline service provider, to remotely programme the memories and emergency routine on the In Touch telephone package.

Repeat Dial

Allows user to dial a number repeatedly without having to press the Redial button.

Replacement Cartridges

High capacity, easy to install replacement cartridges capable of approximately 1700 pages.

RF Modulator

A method of connecting devices to a television.

RF Signal Indicator

Display icons indicating when a call is being made or received.

Ring Back when Free

When activated, notifies of a free line, when an internal extension is free or when an external called party becomes free.

Ringer Volume Control Enables you to adjust the volume of the telephone ringer to a comfortable level, including on or off.

Room Monitoring Facility

Allows user to monitor the noise level in a room. If a certain noise level is reached, the handset will automatically dial the internal or external number that has been set by the user.

Room Temperature Monitor

Allows you to control the temperature of the baby's room with alarms for max. and min. temperature.

Scanner Resolution

The maximum number of dots per inch (dpi) offered for scan quality.

Screen Pops

A feature which identifies a caller based on their Calling Line Identification. When the number is recognised, their database details automatically appear on the computer screen, enabling more personal and efficient business dealings with the caller.

Secrecy

Allows caller to be placed "on hold," to enable conversation without the caller hearing.

Security Software

Integrated security software allows user to manage the network and monitor other users' internet consumption.

Selective Delete

Allows user to delete all data, whether messages or call lists, selectively.

Self-Install ADSL Compatible

Product is pre-configured to work with self-install broadband.

Set-up Button

Used to check and change optional telephone features.

SIM Card Reader

Allows user to download the phone directory from a mobile SIM card to the fixed line phone, enabling the convenience of the same directory no matter which phone is used.

Skip forward/skip back

Skips through MP3 tracks within your stored albums.

Smart Redial

Allows user to "programme" pauses between numbers to aide the calling of home banking or automated services.

SMS Button

Dedicated SMS button appears on the handset.

SMS Indicator

Light flashes when new text messages are received.

SMS Memory Storage

Text messages can be stored in the memory.

Software

The set up CD allows you to create your playlists and select your Internet radio stations.

Sound Activated Call Answering

Allows user to answer incoming calls by either pressing the SPEAK button or by clapping hands twice between rings when positioned near the unit.

Sound Sensitive Lights

Allows you to turn down the volume on the parent unit and still know when your baby stirs.

Speed Dial Number Memory

Store and dial numbers at the touch of one or two buttons.

Standby

The number of hours the handset can be removed from the base unit before recharging is required.

Streams

Streams any stored audio (MP3, WMA etc) on the PC's hard disk.

Switch Compatible

Enables the product to work over

most switchboards.

Talk Back

Parents can talk to their baby via the parent unit.

Talk Time

The number of hours the handset can be used in talk mode before recharging is required.

Talking Caller ID

Announces the number of the caller or the name, if stored in the memory.

Tamper Alerts

Alerts user that attempts have been made to alter devices in the system.

Templates

A selection of common, ready-to-use statements which are easy to insert into your message.

Text Mailboxes

Multiple, PIN code secured text mailboxes are available to receive text messages.

Text Message Indicator

Flashing light, display icon and audible signal indicate when a new text message has been received.

Text Messaging

Also known as SMS messaging, this feature allows user to send and receive short text messages over the fixed line telephone network.

Text Sub-addressing

Allows messages to be routed to different handsets for increased privacy.

Thermometer Feature Displays the temperature when in standby mode.

Time Saving Feature

Allows user to save time when remotely accessing the answering machine.

Transfer Name & Number Directory

Name & Number directories can be transferred to and from Mobile Phones and the product via Bluetooth Technology.

Transmission Speed

The speed at which a fax is transmitted.

Travel Pack

Protects the baby monitor during travel.

Tune

Tune FM radio stations or scroll between MP3 albums or stored internet stations.

TWAIN Compatible

Product is enabled to work with most picture/photographic software.

Two-way Record

Allows user to record telephone conversations as they occur.

Update your BT Friends & Family Numbers

Using three simple programming keys, you can store/dial up to 10 frequently used numbers and inform BT of these numbers using a dedicated button and following the instructions in the user guide.

USB Powered

Unit requires no mains power as

it receives power from the PC to which it is connected.

User Guide

Comprehensive user guides are included with the product.

Uses Existing Wiring

Allows user to network up to ten computers using the existing home telephone extensions and wiring.

V.PCM Upstream

Facilitates faster upstream communication with upload speeds reaching 48,000 bits per second. (Works only if enabled by a user's Internet Service Provider).

V18 Compliant

Allows communication with Textphones world-wide without the need to adjust settings.

Variable Handset Charging Positions

Allows user to charge the handset either face down or face up on the base station.

Variable Ringer Melodies

Changeable handset and/or ringer melodies.

Vibrate Call Alert

Notifies of incoming calls by vibrating, rather than ringing.

VIP Directory

Allows user to dial directory entries by simply speaking the name of the person you wish to call.

Voice Carry Over/Voice Through

Allows user to switch between voice & text during a call. (Requires an additional handset to be connected to the Textphone).

Voice Control

Allows user to operate the answering machine by speaking the commands.

Voice Prompts

Provides useful announcements to help set-up and operate the device.

Voicemail

Allows users to have individual (PIN accessible) mailboxes for receiving individual messages.

VoIP

VoIP (Voice over Internet Protocol) means making telephone calls over the Internet using your PC or Laptop & now Internet Phone.

VOX Operation

Allows the user to have a hands-free conversation over the PMR. The voice is detected by the radio

when a user speaks which then transmits without the need to press the talk button.

Walk & Talk Feature

Enables two handsets to communicate with each other when they are within 300 metres of each other independent of their proximity to the base station.

Wall Mountable

Allows a product to be mounted on a wall either directly or using a bracket.

Warning Alerts

Phone provides alerts for the following situations: No Mains Power, Low Batteries in Phone or Pendant, Line Disconnected, No Emergency Numbers Stored.

Waterproof

Enables the device to be used in wet conditions.

Website Support

A comprehensive, regularly updated website is maintained for this product.

WEP Passcode Security

Allows user to set up WEP encryption using a user-defined passcode.

WEP and WPA Wireless Security

Secures the wireless aspect of the product against attack.

WEP (Wired Equivalent Privacy)

WPA (Wi-Fi Protected Access)

Windows Compatibility

See Additional Information for Windows version compatibility.

Wired Equivalent Privacy (WEP) Security

Secures the wireless aspect of the product against attack.

Wireless Connectivity

Allows communication between devices without the need for wires.

Wireless/range

The player will operate away from the base station, up to 100 metres outdoors (in ideal conditions).

Wireless Repeater

Doubles the range of your wireless network.

Wordwrap

Automatically shifts a word at the end of a line onto a new line in order to keep within pre-set margins.
